FDA is announcing the availability of a draft guidance for industry entitled “Early Alzheimer’s Disease: Developing Drugs for Treatment.” This draft guidance is intended to assist sponsors in the clinical development of drugs for the treatment of the stages of sporadic AD that occur before the onset of overt dementia. This draft guidance revises the draft guidance for industry entitled “Alzheimer’s Disease: Developing Drugs for the Treatment of Early Stage

Disease” issued February 8, 2013 (78 FR 9396), and reflects FDA’s consideration of public comments on the draft guidance. This revision addresses FDA’s current thinking regarding the selection of patients with early AD for enrollment into clinical trials and the selection of endpoints for clinical trials in these populations.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on developing drugs for the treatment of early Alzheimer’s disease. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This draft guidance is not subject to Executive Order 12866.
